

FULLY CHARGED: TAILOR-MADE LOGISTICS FOR ELECTRIC VEHICLES

CHALLENGES OF ELECTRIC VEHICLES

Electric Vehicles (EV) present a new set of logistics considerations that impact different areas of the value chain

OUR RANGE OF SOLUTIONS

We have developed a range of solutions to support the entire process of EV production. We offer a modular approach, allowing us to support customers end-to-end or simply at a particular stage of production, as shown below. We work closely with our customers to look at their specific requirements and offer customized support wherever needed.

DHL IS YOUR PARTNER POWERING THE FUTURE OF AUTO-MOBILITY

We provide sustainable, agile and scalable solutions to meet your EV logistics needs

Our approach

There is no one-size-fits-all solution.

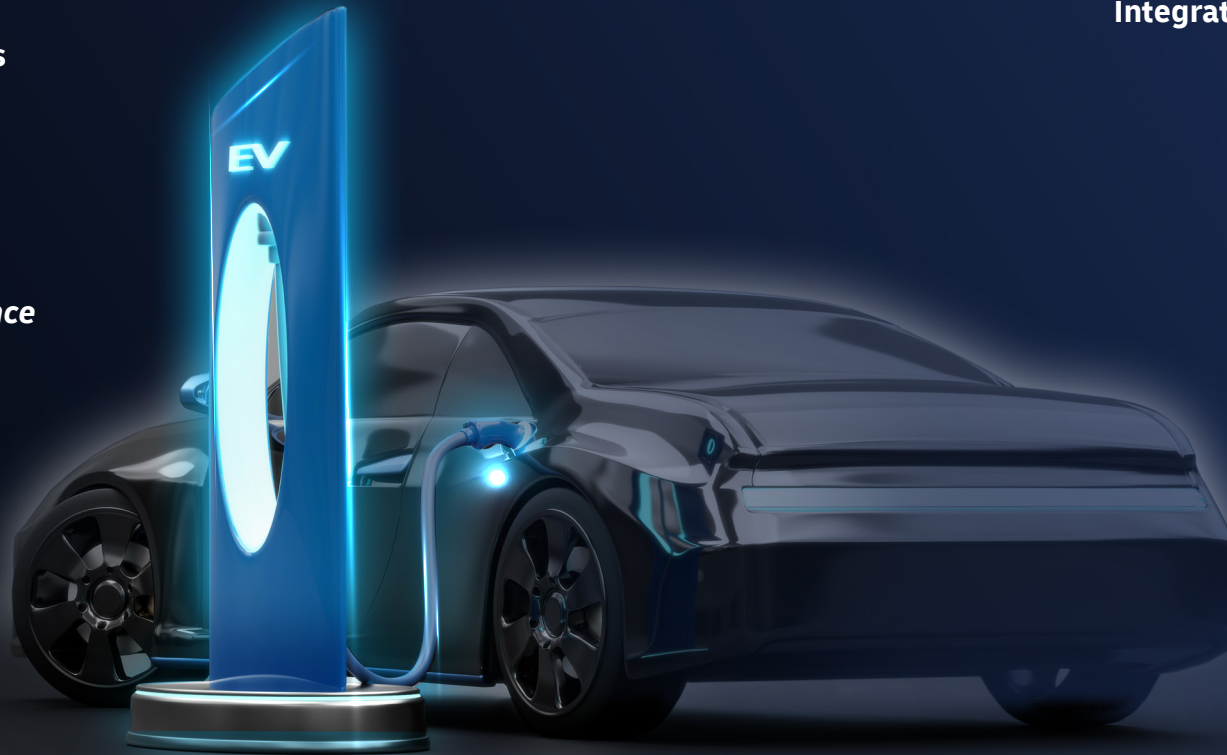

Collaborative solution design with our customers, based on combined experience and EV know how, enables us to design compliant, cost-efficient supply chains **tailored to your needs.**
