

Ocean Freight GoGreen Plus

CO₂ Reduction Via Sustainable Fuel Switch

Accelerate the decarbonization of your ocean shipments with Insetting

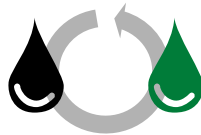

- Use **certified, sustainable marine fuel (SMF)** with DHL
- Leverage SMF (biofuels) which **reduce 100% TtW and up to 85% WtW carbon emissions**
- **Compensate** remaining emissions with **VER Gold Standard carbon credits**
- **Decide on the scope of carbon reduction** (tradelane, shipped weight) of your FCL and LCL* shipments

**GOGREEN
PLUS**

How does it work?

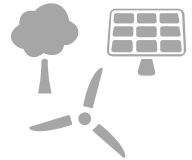

INSETTING (Option 1)

- Replacement of fossil fuel (Heavy Fuel Oil) by SMF on container vessel(s)
- One liter of SMF for one liter of fossil fuel
- Reduces emissions in ocean freight

INSETTING + OFFSETTING (Option 2)

- Insetting +
- Compensation of emissions via VER Gold Standard carbon credits projects
- Door-to-door, full lifecycle emission compensation
- Climate neutral

How does it benefit you?

- Lead **the transition to clean and sustainable ocean freight** transportation
- You automatically benefit from this service for **LCL shipments at no extra cost* if your company has approved SBTi targets**
- **Truly sustainable marine fuel** meeting the criteria of sustainable production
- **Simplify decarbonization** of your **supply chain** through book & claim

We are here to help. For more information contact your local **Sales Representative** or contact us at **dhl.com**

*DHL LCL customers with approved SBTi targets can benefit from DHL LCL GoGreen Plus at no extra cost; this offer is only applicable to DHL Ocean LCL, excluding BCN and MCC.
