

NEED TO STORE OR SHIP LITHIUM BATTERIES?

YOU'RE IN SAFE HANDS WITH DHL

In 2022, DHL Global Forwarding became the first organisation in the United Kingdom to be certified as an International Air Transport Association (IATA) Centre of Excellence for Independent Validators Lithium Batteries (CEIV Li-batt).

We were awarded this status following a rigorous certification process over several months, which included training for employees, as well as an on-site assessment and audit process.

OUR OPERATIONS

Our CEIV Li-batt certification confirms our compliance with the safe packing, handling and shipment of lithium batteries (and products containing them) across six sites in the UK:

- Birmingham
- Glasgow
- London
- Luton
- Manchester
- Purfleet

STORAGE

Long or short-term, we can safely store your lithium batteries or goods containing them - from a single unit to multiple pallets

SHIPMENT

We can ship as quickly as same-day by Air, with Rail, Road and Ocean Freight options available too

HANDLING

We have experts across the UK who are specifically trained in the safe storage, handling and transport of lithium batteries

Paul Chinery, VP Air Freight UK

As holders of the CEIV Li-batt certification, we can be truly recognised for our operational excellence in this area, while continuing to reduce the risks associated with the transportation and handling of lithium battery shipments around the world.
