## GENERAL INFORMATION

### DHL PARCEL MAX PACZKA | DHL PARCEL MAX PÓŁPALETA | DHL PARCEL MAX PALETA

#### Shipments are typically collected from Monday to Friday and delivered on the next business day or within 2 business days.

Business days are Monday through Friday, except bank holidays. The service is provided in locations accessible for delivery vans in the curbside pick-up/delivery system. Pick-up and delivery involves placement of the shipment and its removal from the open load-carrying body. This does not apply to pick-ups and deliveries carried out using the following vehicles: truck-tractor with an articulated trailer, car with a loading capacity of 24 t, car without a trailer with a loading capacity of 5 t or higher. Additional loading and unloading activities are the Customer's responsibility.

DHL Parcel MAX product group offers shipping parcels, half pallets and pallets on a single consignment note, provided that the maximum weight of the shipment does not exceed 2,500 kg.

Palletised shipments being sent to a single Consignee and weighing over 2,500 kg, or shipments consisting of more than 5 pallets, can be processed on separate terms upon consultation with the DHL eCommerce Customer Service Department. If shipments containing more than 5 pallets are to be sent to a single Consignee without prior consultation with the DHL eCommerce Customer Service Department, the time frame for delivering each subsequent shipment beyond the first shipment will be extended: (a) if delivery is to be made on the next business day – by one business day or more, depending on the number of shipments sent; (b) if delivery is to be made within two business days – by two business days or a multiple thereof, depending on the number of shipments sent. DHL eCommerce will determine the order of deliveries.

Shipment dimensions are provided in the order: length x width x height, where length is the longest side of its base. **The minimum height of a pallet is 15 cm.**

## METHOD OF CALCULATING CHARGES

Charges are calculated in accordance with the table for the relevant product in the DHL eCommerce Service Price List – Business.

For each piece the volumetric weight is calculated according to the following conversion factor:

length (cm) x width (cm) x height (cm) / 4,000 or 1 m<sup>3</sup> = 250 kg. The rule is to select the greater weight (actual or volumetric).

The basic charge for a multi-piece shipment is the sum of the basic charges for individual pieces in the shipment.

If at least one element of the piece exceeds the weight of 31.5 kg, the entire shipment will be classified as DHL Parcel MAX.

Should the maximum weight of a pallet be exceeded, a fee will be charged for two pieces: one up to 1,000 kg and another one according to the price list applicable to the DHL Parcel MAX Paleta product.

A request for a DHL eCommerce courier to collect a shipment can be placed via online tools provided by DHL eCommerce or by phone with the DHL eCommerce Customer Service Department. Regular pick-ups can be scheduled upon prior agreement with a DHL eCommerce Sales Representative.

# DESCRIPTION OF ADDITIONAL SERVICES AVAILABLE AND SURCHARGES DOMESTIC PRODUCTS

## SHIPMENT INSURANCE

Additional financial protection can be provided against loss or damage to the shipment. Covers shipments up to PLN 100,000. For combined shipments, an insurance fee for shipments with pieces with a weight above 31.5 kg applies. Extending the scope of the insurance service for shipments with a value over PLN 100,000 requires separate arrangements in a written framework agreement between DHL eCommerce and the Customer. Fee is calculated individually for each shipment based on a submission to the DHL eCommerce Customer Service Department.

## CASH ON DELIVERY (COD)

The collection amount shall be returned within five business days counting from the business day following the day on which the shipment is delivered (the effective date being the date of transferring the money from the DHL Parcel bank account). Each shipment with the COD service is additionally subject to insurance. Recipient can pay the collection amount in cash or by a credit card.

### METHOD OF CALCULATING CHARGES

Charges are calculated in accordance with the table for the relevant product in the DHL eCommerce Service Price List – Business.

For each piece the volumetric weight is calculated according to the following conversion factor:

length (cm) x width (cm) x height (cm) / 4,000 or 1 m<sup>3</sup> = 250 kg. The rule is to select the greater weight (actual or volumetric).

For pieces with a volumetric weight exceeding 31.5 kg (DHL Parcel Connect) or 30 kg (DHL Parcel International), extra charges will be applied: basic charge for parcels above 31.5 kg and additional charge for volumetric weight.

The basic charge for a multi-piece shipment is the sum of the basic charges for individual pieces in the shipment.
